

## Bean (*Phaseolus vulgaris*) cv. Merlin

Merlin is a variety of white beans, navy type. Yield potential is high, and with good agronomic performance, hence excellent for the canning and frost industries. Normally Merlin grows without irrigation.

### VARIETY CHARACTERISTICS

EU registered variety

Starting vigor : medium

Average height : medium

Canopy : erect

Maturity to flowering : mid early

Maturity to harvest : mid early

Disease : good behavior in general

Lodging resistance : good to very good

Yield potential : good to very good

TGW: 210 - 230 g

Rusticity : good

Sowing rate: 100 kg/ha

Use Rhizobium inoculant before sowing.

Sowing : mid May

Harvesting : Beginning to mid September
